JOHN LLOYD D. CANOY

HELLO! I'M JL I'M A DEVELOPER

I am currently based in Cagayan de Oro City, Philippines, currently pursuing a Bachelor of Science in Information Technology. My journey blends two creative worlds: coding and digital art with a vision to merge technology and design into transformative, user-centric experiences. I aspire to create solutions that are not only functional but also visually compelling, bridging the gap between logic and creativity to shape the future of digital interaction.

ABOUT ME:

As an Information Technology student at the University of Science and Technology of Southern Philippines-CDO Campus, I view technology as the ultimate canvas for innovation. I distinguish myself by sitting at the intersection of creative expression and technical execution. With a professional foundation as an illustrator, graphic designer, and 3D artist, I bring a unique visual perspective to software development that many standard developers lack. I am now channeling this creative discipline into the world of code, actively mastering Full-Stack Development and exploring the frontiers of AI/ML. I am not just learning to code; I am learning to architect comprehensive digital solutions that merge the beauty of high-end design with the efficiency of modern computation.

Tech Stack:

Languages & Framework

React | Python | Javascript | Java | Tailwind | TypeScript |
SpringBoot

Software Utilized

VSCode | Figma | Photoshop | Canva | ClipStudioPaint |
MySQL | PostgreSQL

Currently Studying

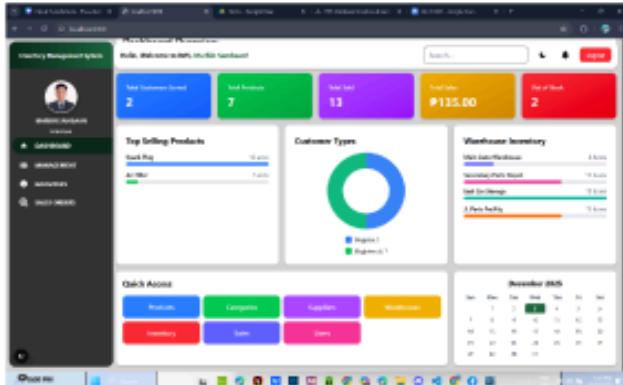

AI/ML

Integrating codes into illustration

HOBBIES

Student Leader

My leadership journey began in my freshman year and has been a defining part of my university experience. Over the years, I have progressed from serving as an Associate Head for the University City Scholars to leading the student body as Vice President of the University Student Government (USG). Most recently, I applied my experience in governance and community building to establish the 4-H Club at USTP-CDO, creating a new avenue for student engagement and advocacy.

HOBBIES

VOLUNTEERING

My volunteer work is not just about participation; it is driven by a clear and purposeful vision to deliver impactful service to the most underserved sectors of our community. I am deeply passionate about bridging the widening gap between the youth and the agricultural sector. Too often, this vital industry is overlooked by my generation, yet it holds the key to our future sustainability. My advocacy is centered on empowering young leaders to look beyond the stereotypes, recognize the immense value of agriculture, and take an active role in securing our nation's food security. By engaging the youth today, I believe we are planting the seeds for a more resilient and self-sufficient tomorrow.
